Quickramps

Design by Ole Frederiksen

IMPROVE EVERYDAY LIFE

Remove the ramp , clean the area, put it back again and again and again and again and again and again and again and again and again and again and again and again...

PRODUCED IN DENMARK

All Excellent Systems products use polyethylene (PELD), which is completely non-toxic and approved for use with foodstuffs.
The same material is used on the inside of milk cartons.

If you make an appointment, our staff will be delighted to guide you through our factory in Mørke where all our products are manufactured.

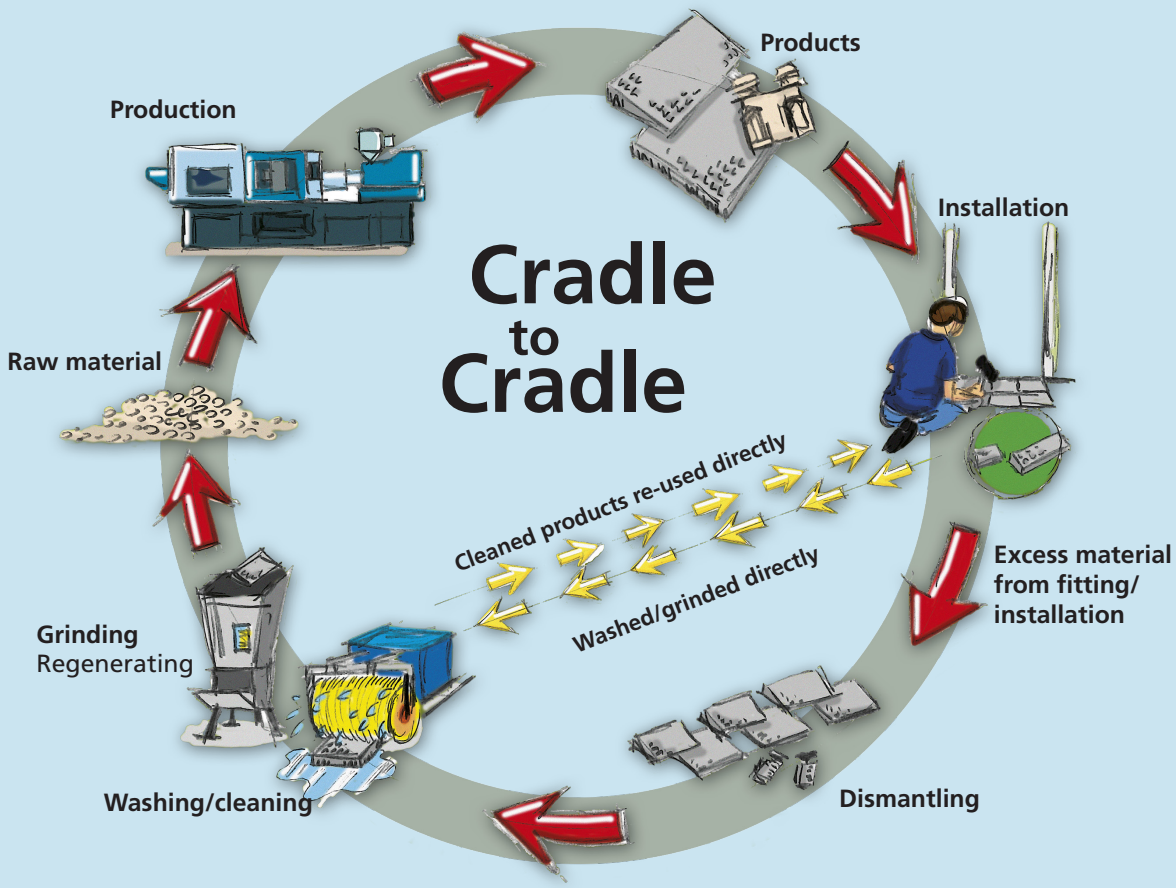
CRADLE to CRADLE PRINCIPLE



We repurchase your used Excellent ramps as soon as you discard them. They are regenerated and converted into new ramps, thus protecting the environment.

The Danish Minister of Environment, Ms. Kirsten Brosbøl, during her visit in February 2015.

In connection with the campaign "avoid waste/stop wasting" launched by the Danish Ministry of the Environment, the then Danish Minister for the Environment, Ms. Kirsten Brosbøl (Social Democrats) visited Excellent Systems. On this occasion she was informed about Excellent Systems' reduction of production waste and packaging materials as well as the cradle-to-cradle principle for all products, introduced as early as in 1992.

PRICES 4 - 8mm
